For Men

History and Future started in Sweden in the autumn of 2022 with the idea of producing high-quality and sustainable skincare products.

Today, we are a global company that wants to help change the stereotypical image of masculine men who abstain from skincare.

With a focus on quality and outer packaging, we believe that our products should be used by men of all ages and continents. Our range is created with the aim of increasing men's interest and desire to use skincare in the form of category collections for him. The products are also adapted to be offered in the form of single products for the man who is not yet familiar with skincare.

Since the start, it has been important for us to be able to develop products that are adapted for men in terms of time. With that in mind, we've also made it simple with the steps in our collections requiring just a few minutes a day to give yourself a healthier you.

The collections are perfect as a gift for a marriage kit, honeymoon kit, birthday, Valentine's Day, Father's Day, or why not as an everyday gift to yourself.

Our loyalty partner is a contract manufacturer to History and Future since 2023 and geographically located in Northwest Turkey, producing aromatic medicinal plants and cosmetic products in accordance with GMP standards.

We have R&D and quality control laboratories in our production facility. In these laboratories, the following analyses and tests can be performed with high-tech equipment: Physical analyses, Chemical analyses, Microbiological tests, Stability tests. Our production capacity 12.800.000 year

Sincerely
